

# Experiment in Maize / Corn

December 2010

- Location: Bang Duan / Suphanburi, Thailand
- Test plot has been sprayed 2 times with **HERBAGREEN®**. The 1<sup>st</sup> time when the ears just showed up and the 2<sup>nd</sup> time 3 weeks later when they developed into size.
- On this plot, Previous harvests reached 1,5 t. Revenue for the farmers has been about 15,000 thb.
- Working with **HERBAGREEN®**, the harvest increased to 3 t. Revenue increased to 30,000 thb and doubling his income !
- Visual observation: corn seeds are bigger in size, corn is wider and longer. 2 ears /corns – reach 1 kg. Also a consistent ear size helped to optimize the yield.

# Improved by *HERBAGREEN®*

---

# Clear clean quality, larger in size

# More harvest

---

# More income!
