

HERBAGREEN® , a simple solution for successful farming.

HERBAGREEN® consists of simple, natural Limestone (Calcite) smashed into Nano sized particles.

HERBAGREEN® is applied on to the leaves of plants, where its Nanoparticles penetrate directly through the Stoma (the pores of a leaf) into the leaves. It's Calcium unfold immediately the outstanding growth-effects. Starting with empowering the Photosynthesis, plants create within short time more roots and are then able to transport more and additional nutrients. Consequently, HERBAGREEN® leads to an increase of harvests between 15 and 50 %.

Simultaneously the

- **use of Chemical Fertilizers can be reduced by 50 % up to 70 %,**
 - **the use of Pestizides and Fughizides can be reduced by about 50 %.**
 - **and: the plants need up to 50 % less water.**
- With HERBAGREEN® we change the way of farming.**

Our target is to benefit farmers in South East Asia fundamentally

- in enabling them to save between 50 % and 70 % of Chemical Fertilizers - HERBAGREEN® is activating the capacity of the plants to take up nutrients while producing more and better products;
- in enabling them to increase their harvest by 15 % to 50 %;
- in enabling them to save up to 50 % of chemical Pestizides and Funghizides - HERBAGREEN® is strengthening the Immunity System of all plants.
