

HERBAGREEN® PRODUCTS

Product Name HERBAGREEN®

Contain : Calcium (CaO) 32.31%

Weight : 1 Kg.

Price : [Click here](#)

Property :

HERBAGREEN® is a new generation of a **100% natural mineral** consisting of calcite (CaMg)CO₃.

In a patented process it is **micronized** and available in the form of a fine powder. Dispersed in water (only 200g per 100 liters of water) it is sprayed out.

Due to its properties it easily up taken by plants where it split into carbon dioxide (CO₂), Calcium oxide (CaO) and Magnesium oxide (MgO), important micro nutrients. These nutrients are immediately available to the plants.

The CO₂ results in a very strong photosynthesis and the fast growth of healthy plants.

These **healthy plants are hardly attacked by pests and diseases**

The final outcome is a substantially **higher yield** (at least 20 – 30%) and **high**

quality crop

due to a

higher BRIX

(biomass).

Fruits and Vegetables have a better taste (higher sugar content)

Cost of farming is reduced since chemical fertilizers can be saved up to 70% and hardly any pesticides need to be applied.

Extensive tests has been done and these results are available
